

TDS[®] Network

For almost 50 years, TDS Telecommunications Corporation (TDS) has been a leader in connecting businesses nationwide with reliable, scalable, and secure telecommunications services.

Network Features & Benefits:

- **More than 1,000 Internet exchanges (peering):** shorter-hop connections for faster, more efficient data transfer rates.
- **Connections to Tier 1 IP Transit Providers:** steady nationwide coverage through core locations in Chicago, New York, Atlanta, Denver, and Los Angeles.
- **High-performance, carrier-grade Cisco routers:** industry-leading technology for high availability and scalability.
- **Network Monitoring 24x7x365:** real-time identification and support of network issues.
- **Geographically dispersed and secure servers:** diverse access ensures network service is not impacted by a single, isolated outage.
